

RoeTest – Computer Tube Tester / Tube Measuring System
(c) - Helmut Weigl www.roehrentest.de

translation to english by Gerhard Oed (thank you very much to him)

Measuring the first time:

Insert tube into the device

Select appropriate tube data (Button <laden Röhrendaten>)

Press button for desired measuring method (for example: <statische Messung>)

Most suitable is to perform the first measurement using a simple standard tube
(for example an EF80).
