

## Target - Files

30.03.2013

In the future 'Target'-PCB-Layouts will be delivered. So you can print out the PCB layouts and mounting plans or order the printed circuit boards at PCB manufacturers with the Gerber- and Drill-data files.

### Notes regarding my Copyright:

The layouts should not be changed as they are field tested. If you still have a need for changes you may make alterations for your own use. Delivery of the original or modified layouts to third persons is not allowed without my consent. Delivery is only allowed for manufacturing to PCB manufacturers. My copyright hints on the layouts must not be removed. Also you must not offer the printed circuit boards for sale.

### Hints for processing:

Depending on the task, you need different versions of the 'Target' program:

	Target-Viewer free of charge	Target-Discover free of charge, can be downloaded at office Ing. Friedrich	Target- Professional- Version, for sale at Ing.Friedrich
Inspect all layouts and print them (Layouts and <b>Mounting plans</b> ), Gerber and Drill data ...	x	x	x
Change main PCB parts			x
Change all other PCBs		x	x

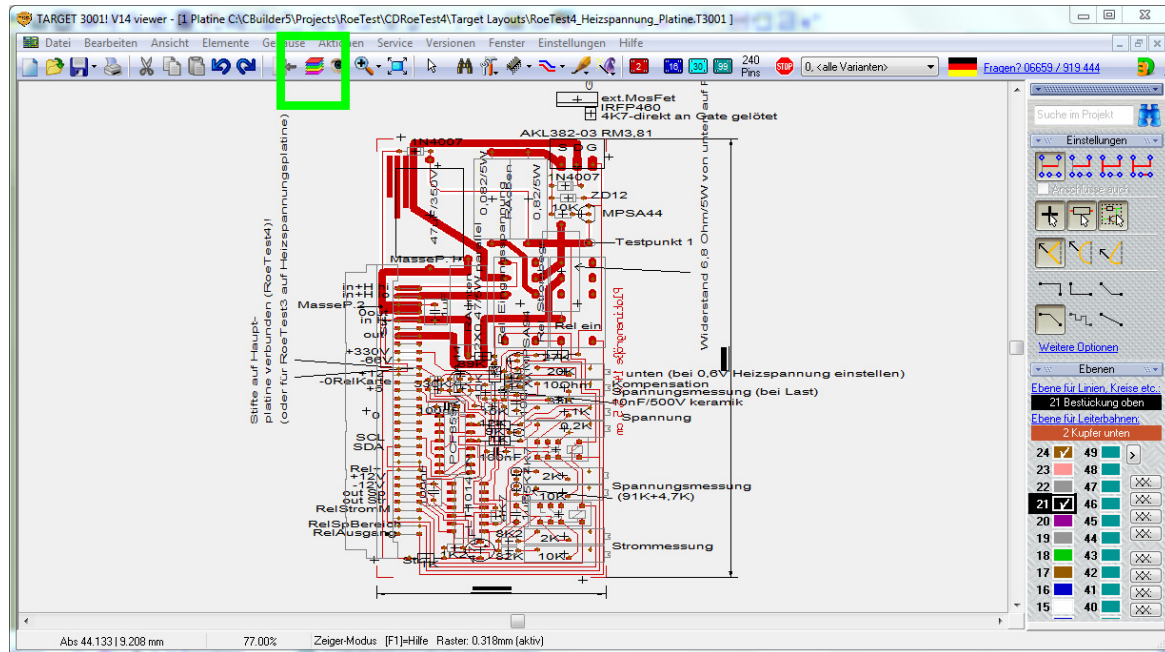

The CD contains the free of charge Target-Viewer.

## Short notices for the Target-Viewer:

All those layers that you can see on the screen will be printed. So first select the layers and then print them:

PCB layout	Layer 0(Area), 1(Clear), 2(Copper on bottom), 14,15,16 (top) 24 (Drill holes), 23 (PCB outline)
Mounting plan	all Layers (deselect those not needed).

The layers are selected using the green framed icons:

Printing the layouts: Always assure that the scale is correct!
